Foxon

CONTENTS

No. 1

PAGE

OBITUARY NOTICE 1

I. The selective fermentation of glucose and fructose by brewer's yeast. By H. IVEKOVICH 4

II. The chemical investigation of "bios." Part I. By B. T. NARAYANAN 6

III. The concentration of vitamin B_2. By B. T. NARAYANAN and J. C. DRUMMOND. (With four figures) 19

IV. The relative vitamin A value of the body and liver oils of certain fish. By B. AHMAD and J. C. DRUMMOND. (With six figures) 27

V. The preservation of the antiscorbutic vitamin in lemon juice. By J. WILLIAMS and J. W. CORRAN 37

VI. The preparation of glutathione from yeast and liver. By N. W. PIRIE 51

VII. Determination of volatile substances. By G. GAZENKO. (With one figure) 55

VIII. The determination of sucrose by Hanes's modification of the Hagedorn-Jensen method. By E. H. CALLOW. (With one figure) 57

IX. Studies on hemicelluloses. I. The hemicelluloses of wheat bran. By F. W. NORRIS and I. A. PREECE 59

X. The solubility of glycogen. By M. KERLY. (With four figures) . . 67

XI. Further evidence for a third accessory "B" factor. By V. READER. (With two figures) 77

XII. Uricase and its action. By S. J. PRZYLECKI 81

XIII. The antiscorbutic potency of apples. By M. F. BRACEWELL, E. HOYLE and S. S. ZILVA 82

XIV. Observations upon the reducing substances of pigeons' blood. By J. M. GULLAND and R. A. PETERS. (With one figure) 91

XV. Heat-stability of the (anti-dermatitis, "anti-pellagra") water-soluble vitamin B_2. By H. CHICK and M. H. ROSCOE 105

XVI. Sphingomyelin, phrenosin and kerasin in films one molecule thick on water. By K. TURNER and M. M. WATSON. (With one figure) . . 113

XVII. The phosphoric esters of alcoholic fermentation. By R. ROBISON and W. T. J. MORGAN 119

XVIII. The colour reactions and absorption spectra of sterols in relation to structure. By I. M. HEILBRON and F. S. SPRING 133

XIX. Absorption spectra in relation to vitamin A. By R. A. MORTON, I. M. HEILBRON and F. S. SPRING. (With two figures) 136

XX. The inhibition of lactic acid formation in cancer and muscle. By S. T. HARRISON and E. MELLANBY 141

XXI. The denaturation of proteins. VI. The titration of the basic and acidic groups in egg-albumin. By N. BOOTH. (With three figures) . . 158

XXII. Lactic acid formation in muscle extracts. V. A comparison between soluble starch and glycogen in respect of lactic acid formation and phosphoric ester accumulation. By D. STIVEN 169

PAGE

XXIII. Lactic acid formation in muscle extracts. VI. The influence of irradiation on lactic acid formation and phosphoric ester accumulation from glycogen. By D. Stiven. (With two figures) 172

XXIV. Structure and enzyme reactions. VIII. The physical state of the sorbent. By S. J. Przylecki and M. Gurfinkel 179

XXV. The stereochemical specificity of esterases. I. The affinity of liver esterases for optically active alcohols. By D. R. P. Murray and C. G. King. (With six figures) 190

XXVI. The vitamin B content of grass seeds in relationship to manures. By M. J. Rowlands and B. Wilkinson. (With eleven figures) . . . 199

XXVII. Note upon the sulphur linkage in wool. By C. Rimington . 205

XXVIII. A quantitative study of succinic acid in muscle. III. Glutamic and aspartic acids as precursors. By D. M. Needham. (With four figures) . 208

No. 2

Obituary Notice 229

XXIX. The effect of cereal extracts on blood-calcium. By L. Mirvish . 233

XXX. The tyrosinase-tyrosine reaction. VII. The action of tyrosinase on certain substances related to tyrosine. By W. L. Dulière and H. S. Raper. (With one figure) 239

XXXI. Sulphur in organic and inorganic combination in pasture grasses. By H. A. A. Aitken 250

XXXII. Surface films of batyl, chimyl and selachyl alcohols. By B. C. J. G. Knight. (With two figures) 257

XXXIII. The decarboxylation of pectin. By F. V. Linggood . . . 262

XXXIV. The composition of the mixed fatty acids present in the glycerides of cod-liver and certain other fish-liver oils. By K. D. Guha, T. P. Hilditch and J. A. Lovern 266

XXXV. The effect of glutathione on the determination of blood-sugar. By F. K. Herbert, M. C. Bourne and J. Groen. (With one figure) . . . 291

XXXVI. The non-sugar reducing substances of human blood, with special reference to glutathione. By F. K. Herbert and M. C. Bourne . 299

XXXVII. On the catalysis of the oxidation of cysteine and thioglycollic acid by iron and copper. By K. A. C. Elliott. (With fourteen figures) . 310

XXXVIII. A study of the composition of human milk in the later periods of lactation and a comparison with that of early milk. By S. T. Widdows, M. F. Lowenfeld, M. Bond and E. I. Taylor 327

XXXIX. Fermentation by yeast preparations. By A. Harden and M. G. Macfarlane. (With two figures) 343

XL. Phosphoric esters in alcoholic fermentation. II. Pyrophosphate in yeast preparations. By E. Boyland. (With one figure) 350

XLI. Note on the determination of total calcium in blood-serum. By J. Patterson 355

XLII. Studies on gelatin. XI. Diamino-nitrogen of gelatin. By K. V. Thimann. (With three figures) 357

XLIII. The precipitation of the basic amino-acids of proteins with phosphotungstic acid. By K. V. Thimann. (With Plate I and three figures) . 368

XLIV. Investigations on the hydrolysis products of fish muscle. I. The diamino-nitrogen of cod muscle. By J. C. Kernot, J. Knaggs and N. E. Speer 379

PAGE

XLV. The influence of the hypophysis on metabolism, growth and sexual organs of male rats and rabbits. II. Influence of extracts of hypophysis on the body weight, weight of fat, of sexual organs and of endocrine organs of rats. By V. Korenchevsky 383

XLVI. The Hagedorn-Jensen method applied to various sugars. Relation of reducing power to configuration. By H. Sobotka and M. Reiner. (With one figure) 394

XLVII. A note on the oxygen consumption of nerve in the presence of glucose and galactose. By M. Sherif and E. G. Holmes. (With two figures) 400

XLVIII. Studies on pectin. IV. The oxidation of pectin by Fenton's reagent and its bearing on the genesis of the hemicelluloses. By A. G. Norman and F. W. Norris 402

XLIX. Xanthine oxidase in the avian embryo. By E. J. Morgan . . 410

L. Factors affecting the catalytic action of copper in the oxidation of cysteine. By C. A. Elvehjem. (With eleven figures) 415

LI. The action of salts on fumarase. I. By P. J. G. Mann and B. Woolf. (With six figures) 427

LII. The chemistry of oestrin. III. An improved method of preparation and the isolation of crystalline material. By G. F. Marrian. (With Plate II) 435

LIII. Studies on antiglyoxalase. I. The action of pancreatic extract on phenylglyoxal. By J. O. Giršavičius. (With two figures) 446

LIV. The alleged contamination of carotene by vitamin A. By N. S. Capper. (With one figure) 453

LV. The isolation of *l*-thyroxine from the thyroid gland by the action of proteolytic enzymes. By C. R. Harington and W. T. Salter . . . 456

LVI. The properties of pure glutathione. By N. U. Meldrum and M. Dixon. (With twenty-three figures) 472

LVII. Further experiments on cancer-producing substances. By E. L. Kennaway 497

LVIII. The spectra of cancer-producing tars and oils and of related substances. By I. Hieger. (With Plates III and IV) 505

LIX. Oxidation-reduction potentials of cultures of haemolytic streptococci. I. By L. F. Hewitt. (With eleven figures) 512

LX. Studies in gas production by bacteria. I. Apparatus for the measurement of the rate of gas production. By J. A. Cranston. (With three figures) 525

LXI. Studies in gas production by bacteria. II. Denitrification and bacterial growth phases. By B. Lloyd and J. A. Cranston. (With ten figures) 529

LXII. The production of hydrogen sulphide by animal tissues. By E. Sluiter. (With seven figures) 549

LXIII. A redetermination of the titration dissociation constants of arginine and histidine with a demonstration of the zwitterion constitution of these molecules. By T. W. Birch and L. J. Harris. (With two figures) . 564

No. 3

Obituary Notices 577

LXIV. The reduction of methylene blue in milk. The influence of light. By H. R. Whitehead 579

LXV. The traces of combustible gases in human expired air. By T. R. Parsons 585

PAGE

LXVI. The influence of arginine upon the growth rate of a transplantable tumour in the mouse. By E. Gilroy 589

LXVII. A study of the acid-base equilibrium of the ocular humours. By P. W. Salit. (With one figure) 596

LXVIII. The inactivation of trypsin by heat. By J. Pace. (With one figure) 606

LXIX. Insulin and increase in weight of young animals. By J. J. R. Macleod, H. E. Magee and W. Middleton 615

LXX. The characteristic absorption of ultra-violet radiation by certain purines. By E. R. Holiday. (With two figures) 619

LXXI. The isolation of histamine from the heart. By W. V. Thorpe . 626

LXXII. The absorption and excretion of calcium and phosphorus by rats receiving excessive doses of irradiated ergosterol. By E. Watchorn. (With two figures) 631

LXXIII. The chemical aspect of the drying of timber. By W. G. Campbell and J. Booth 641

LXXIV. Studies on pectin. V. The hydrolysis of pectin. By A. G. Norman and J. T. Martin 649

LXXV. The phosphorus distribution in blood and the calcium and phosphorus excretion during hypervitaminosis D. By C. A. Ashford. (With three figures) 661

LXXVI. Oxidation-reduction potentials of cultures of *C. diphtheriae*. I. By L. F. Hewitt. (With six figures) 669

LXXVII. Oxidation-reduction potentials of staphylococcal cultures. I. By L. F. Hewitt. (With five figures) 676

LXXVIII. The fat-soluble vitamins of milk. By M. E. F. Crawford, J. Golding, E. O. V. Perry and S. S. Zilva. (With seven figures) . . 682

LXXIX. Vitamin A and carotene. V. The absence of the liver oil vitamin A from carotene. VI. The conversion of carotene to vitamin A *in vivo*. By T. Moore. (With two figures) 692

LXXX. Phosphoric esters in alcoholic fermentation. III. The lag between phosphate esterification and carbon dioxide evolution. IV. Oxidation-reduction potentials of yeast-preparations. By E. Boyland. (With one figure) 703

LXXXI. Carbohydrate metabolism in birds. II. Brain localisation of lactic acidosis in avitaminosis B, and its relation to the origin of symptoms. By H. W. Kinnersley and R. A. Peters 711

LXXXII. The metabolism of developing salmon eggs. I. The significance of hatching and the rôle of water in development. By F. R. Hayes. (With two figures) 723

LXXXIII. The metabolism of developing salmon eggs. II. Chemical changes during development. By F. R. Hayes. (With four figures) . . 735

LXXXIV. The micro-determination of hydroxyl groups. By P. M. Marrian and G. F. Marrian. (With one figure) 746

LXXXV. Natural anthocyanin pigments. I. The magenta flower pigment of *Antirrhinum majus*. By R. Scott-Moncrieff. (With six figures) . 753

LXXXVI. Natural anthocyanin pigments. II. The magenta flower pigment of *Primula polyanthus*. By R. Scott-Moncrieff. (With three figures) 767

LXXXVII. The influence of insulin on the distribution of glycogen in normal animals. By B. Corkill 779

LXXXVIII. The comparative rates of absorption of sugars from the human intestine. By R. A. McCance and K. Madders. (With five figures) 795

PAGE

LXXXIX. Studies on the kinetics of haemolytic systems. IV. A further study of the series of Ryvosh. By E. Ponder, G. Saslow and J. F. Yeager 805

XC. The determination of the quantity of free water in erythrocytes. By C. Krevisky 815

XCI. The use of the Barcroft apparatus for the measurement of tissue respiration. By M. Dixon and K. A. C. Elliott. (With ten figures) . . 820

XCII. The oxygen capacity of the blood in one hundred cases of mental disorder. By D. L. Woodhouse and F. A. Pickworth. (With three figures) 834

No. 4

XCIII. The nature of the blood-sugar. By L. B. Winter 851

XCIV. The dissociation of calcium citrate. By W. J. Wiley. (With two figures) 856

XCV. Observations on a diatom (*Nitzschia closterium* W. Sm.) as a source of vitamin A. By B. Ahmad. (With three figures) 860

XCVI. The composition of the fatty acids present as glycerides in the liver oil of the thresher shark (*Alopoecia vulpes*). By J. A. Lovern . . 866

XCVII. Vitamin A of butter. By R. A. Morton and I. M. Heilbron. (With three figures) 870

XCVIII. The action of the cinchona and certain other alkaloids in bird malaria. By J. A. Goodson, T. A. Henry and J. W. S. Macfie . . . 874

XCIX. The inactivation of pancreatic lipase by heat. By I. H. McGillivray. (With three figures) 891

C. Carbohydrate metabolism of normal and tumour tissue. Part I. A method for the measurement of the respiratory quotient. By F. Dickens and F. Simer. (With two figures) 905

CI. Oxidations in central and peripheral nervous tissue. By E. G. Holmes. (With seven figures) 914

CII. Selective fermentation. I. Alcoholic fermentation of glucose, fructose and mannose mixtures. By H. Sobotka and M. Reiner . . . 926

CIII. The heat-stability of the (antidermatitis, "anti-pellagra") water-soluble vitamin B_2. II. By H. Chick and A. M. Copping 932

CIV. The stability of watery solutions of the oxytocic principle of the pituitary gland. By J. H. Gaddum. (With two figures) 939

CV. Synthesis of the *i*-hydroxy-asparagines. By A. C. Chibnall. A note on their dissociation constants. By R. K. Cannan 945

CVI. The effect of cryptorchidism and of castration on the chemical composition of rats. By V. Korenchevsky and M. Dennison 954

CVII. An improved design of the Van Slyke apparatus for the estimation of amino-nitrogen. By S. J. Folley. (With two figures) 961

CVIII. A sensitive reaction for cysteine. By R. Fleming 965

CIX. Vitamin C and the rat's diet. By G. A. Hartwell. (With one figure) 967

CX. Studies on hemicelluloses. II. The hemicelluloses of maize cobs. By I. A. Preece 973

CXI. Carotene and vitamin A. The transformation of carotene into vitamin A as shown by a study of the absorption spectra of rat-liver oils. By N. S. Capper. (With one figure) 980

CXII. Note on the possible mechanism of diphtheria toxoid formation. By L. F. Hewitt. (With two figures) 893

PAGE

CXIII. The specific refraction increments of serum-albumin and serum-globulin. By G. S. Adair and M. E. Robinson. (With one figure) . . 993

CXIV. The action of pepsin on gelatin. By R. K. Cannan and E. Muntwyler. (With two figures) 1012

CXV. The chemistry of oestrin. IV. The chemical nature of crystalline preparations. By G. F. Marrian 1021

CXVI. Properties of the comb-growth-promoting substance obtained from testes and urine. By E. C. Dodds, A. Greenwood, H. Allan and E. J. Gallimore. (With three figures) 1031

CXVII. On the mechanism of sugar excretion. I. Glucose. By T.-G. Ni and P. B. Rehberg. (With three figures) 1039

CXVIII. Note on Montignie's isomer of cholesterol, and the effect of heat on cholesterol. By Y. Kaishio and J. A. Gardner 1047

CXIX. The action of arsenate on hexosephosphatase. By M. G. Macfarlane 1051

CXX. Chemical change in gelatin resulting from the method of storage. By K. V. Thimann and A. B. Page. (With one figure) 1058

CXXI. The effects of cystine diet on keratin composition in rabbit wool. By J. Barritt, A. T. King and J. N. Pickard 1061

CXXII. Oxidation-reduction studies in relation to bacterial growth. I. The oxidation-reduction potential of sterile meat broth. By B. C. J. G. Knight. (With two figures) 1066

CXXIII. Oxidation-reduction studies in relation to bacterial growth. II. A method of poising the oxidation-reduction potential of bacteriological culture media. By B. C. J. G. Knight. (With two figures) 1075

CXXIV. Zwitterions. I. Proof of the zwitterion constitution of the amino-acid molecule. By L. J. Harris. II. Amino-acids, polypeptides, etc., and proteins as zwitterions, with instances of non-zwitterion ampholytes. By T. W. Birch and L. J. Harris. (With eighteen figures) . . . 1080

CXXV. Variations in the component fatty acids of butter due to changes in seasonal and feeding conditions. By T. P. Hilditch and J. J. Sleightholme 1098

CXXVI. The colorimetric determination of cystine by means of the uric acid reagent. By C. Rimington 1114

CXXVII. Lactic acid oxidation in brain with reference to the "Meyerhof cycle." By E. G. Holmes and C. A. Ashford. (With one figure) . . 1119

CXXVIII. The rate of liberation of arginine in tryptic digestion. By J. A. Dauphinee and A. Hunter. (With three figures) 1128

CXXIX. The determination of blood-sugar. I. Critical analysis of the reduction of alkaline copper reagents by glucose and other substances. By S. L. Tompsett 1148

CXXX. The determination of blood-sugar. II. The effect of different deproteinising agents upon the estimation of blood-sugar. By S. L. Tompsett 1164

CXXXI. Some factors involved in the experimental production of pellagra in rats. I. Preliminary. By V. R. Leader. (With three figures) . . 1172

CXXXII. Comparison of the effects of arginine and thyroxine upon tumour growth-rate in the mouse. By E. Gilroy. (With five figures) . . 1181

CXXXIII. A new method for the separation of the products of protein hydrolysis. By M. A. B. Brazier 1188

CXXXIV. The action of insulin on the glycogen distribution in normal animals. By M. W. Goldblatt 1199

CXXXV. Studies in photosynthesis. I. The formaldehyde hypothesis. By E. C. Barton-Wright and M. C. Pratt 1210

PAGE

CXXXVI. Studies in photosynthesis. II. The first sugar of carbon assimilation and the nature of the carbohydrates in the narcissus leaf. By E. C. Barton-Wright and M. C. Pratt. (With seven figures) . . . 1217

CXXXVII. The chemistry of the white rots of wood. I. The effect on wood substance of *Polystictus versicolor* (Linn.) Fr. By W. G. Campbell . 1235

CXXXVIII. The disturbance of metabolism produced by bony and non-bony injury, with notes on certain abnormal conditions of bone. By D. P. Cuthbertson 1245

No. 5

CXXXIX. Lipase and its action. I. The synthetic action of pancreatic lipase in the system: oleic acid-glycerol-water-dissolved lipase. By E. A. Sym. (With two figures) 1265

CXL. On the invertase-accelerator of serum, with observations on other enzyme-accelerators reported in serum. By J. Fine. (With five figures) . 1282

CXLI. Amino-acids of tissues. IV. The diamino-acid content of muscle tissue of different classes of animals. By J. L. Rosedale and J. P. Morris 1294

CXLII. Amino-acids of tissues. V. Monoamino-acids of the horse mackerel (*Caranx rottleri*). By J. L. Rosedale and C. J. Oliveiro . . 1297

CXLIII. The metabolism of normal and tumour tissue. II. The respiratory quotient, and the relationship of respiration to glycolysis. By F. Dickens and F. Simer. (With Plate V) 1301

CXLIV. The fatty acids in the liver of the sheep. By K. Turner . . 1327

CXLV. The enzymic synthesis of raffinose. By A. V. Blagoveschenski 1337

CXLVI. Uricase and its action. II. Bacterial nature of the action of uricolytic extracts and dialysates. By R. Truszkowski 1340

CXLVII. Uricase and its action. III. Comparison with activated charcoal. Contact nature of the action of uricase. By R. Truszkowski. (With two figures) 1349

CXLVIII. Uricase and its action. IV. Preparation and properties of ox-kidney uricase. By R. Truszkowski. (With two figures) 1359

CXLIX. The urocarmine reaction. By W. R. Fearon and A. G. Thompson 1371

CL. The effect of freezing in a concentrated solution of sodium chloride on the colour of red muscle. By J. Brooks. (With two figures) . . . 1379

CLI. Avitaminosis B in relation to tumour growth. By E. Gilroy . 1384

CLII. Studies on the metabolism of animals on a carbohydrate-free diet. I. The distribution of glycogen and fat in the liver of animals fed on a carbohydrate-free diet. By A. Hynd and D. L. Rotter 1390

CLIII. A study of the bile pigments in relation to the Van den Bergh reaction. By W. J. Griffiths and G. Kaye 1400

CLIV. The glycogen of mammalian muscle and its behaviour after death. By I. A. Anderson and J. J. R. Macleod 1408

CLV. The behaviour of glutathione in yeast. By N. U. Meldrum . . 1421

CLVI. The determination of cellulose in straws. By S. H. Jenkins . 1428

CLVII. The biochemistry of aluminium. I. Excretion and absorption of aluminium in the pig. By K. Mackenzie 1433

CLVIII. The mode of action of tyrosinase. By C. E. M. Pugh . . 1442

CLIX. An improved method for the determination of iodine in blood. By H. A. A. Aitken. (With one figure) 1456

PAGE

CLX. The absorption of water by gelatin. IV. The influence of temperature. By D. JORDAN-LLOYD. (With six figures) 1460

CLXI. The absorption of water by gelatin. V. The influence of calcium hydroxide. By W. B. PLEASS. (With three figures) 1472

CLXII. The vitamin B_2 content of cereals and the supposed connection between human pellagra and deficiency of this vitamin. By W. R. AYKROYD 1479

CLXIII. The alleged presence of bile salts in normal blood. By E. WALKER 1489

CLXIV. The chemistry of the products of *Cocos nucifera*. I. By J. P. C. CHANDRASENA 1493

CLXV. Oxidation-reduction studies in relation to bacterial growth. III. The positive limit of oxidation-reduction potential required for the germination of *B. tetani* spores *in vitro*. By B. C. J. G. KNIGHT and P. FILDES. (With three figures) 1496

CLXVI. The question of the identity of a bacterial growth-promoting factor with vitamin B_1. By J. G. DAVIS and J. GOLDING. (With one figure) 1503

CLXVII. The preparation and properties of the gonad-stimulating hormone from the urine of pregnancy. By F. DICKENS. (With Plate VI) . . 1507

CLXVIII. Pyruvic acid in bacterial metabolism. With an account of the methods used for the detection and determination of pyruvic acid. By R. P. COOK. (With one figure) 1526

CLXIX. A comparison of the dehydrogenations produced by *B. coli communis* in the presence of oxygen and methylene blue. By R. P. COOK. (With nine figures) 1538

CLXX. Oxidation-reduction potentials of Pneumococcus cultures. I. By L. F. HEWITT. (With six figures) 1551

CLXXI. A cell for the measurement of the specific conductivity of the blood-serum. By W. R. ASHBY. (With one diagram) 1557

CLXXII. Irradiated ergosterol and calcium-free diet: effect on calcium and phosphorus metabolism. By E. WATCHORN 1560

CLXXIII. Production of ammonia by surviving kidney tissue. II. Studies on the possible precursors of urinary ammonia. By B. E. HOLMES and A. PATEY. (With two figures) 1564

CLXXIV. Manganese in relation to nutrition. By M. B. RICHARDS . 1572

No. 6

CLXXV. "Diet 4" for breeding rats for work on vitamin A. By S. V. GUDJÓNSSON. (With six figures) 1591

CLXXVI. The influence of foodstuffs on the acid-base balance of cattle urine. By F. J. WARTH and N. K. AYYAR. (With one figure) . . . 1595

CLXXVII. The colorimetric determination of the tyrosine and tryptophan content of various crude protein concentrates. By W. D. MCFARLANE and H. L. FULMER 1601

CLXXVIII. Studies in embryonic mortality in the chick. I. The effect of diet upon the nitrogen, amino-nitrogen, tyrosine, tryptophan, cystine and iron content of the proteins and on the total copper of the hen's egg. By W. D. MCFARLANE, H. L. FULMER and T. H. JUKES. (With one figure) . 1611

CLXXIX. Vitamin B deficiency in the rat. Bradycardia as a distinctive feature. By A. N. DRURY, L. J. HARRIS and C. MAUDSLEY. (With four figures) 1632

PAGE

CLXXX. Vegetable proteins. I. The proteins of *Dolichos lab lab*. By D. Narayanamurti and C. V. Ramaswami. (With one figure) . . . 1650

CLXXXI. Irradiation of *Dolichos* tyrosinase. By D. Narayanamurti and C. V. Ramaswami 1655

CLXXXII. Further observations upon the correlation between the arginine and vitamin B content of diets, and the effect of thyroxine upon tumour growth. By E. Gilroy. (With two figures) 1659

CLXXXIII. On the organic matter given off by algae. By A. Krogh and E. Lange with W. Smith 1666

CLXXXIV. The behaviour of δ-keto-*n*-hexoic acid in the perfused liver. By W. L. Dulière and H. S. Raper. (With one figure) 1672

CLXXXV. The male hormone. IV. By C. Funk and B. Harrow . 1678

CLXXXVI. Purinolytic enzymes of the human organism. By R. Truszkowski 1681

CLXXXVII. The antiscorbutic fraction of lemon juice. IX. By S. S. Zilva. (With two figures) 1687

CLXXXVIII. The denaturation of proteins. VII. Denaturation in the presence of alcohol. By N. Booth. (With one figure) 1699

CLXXXIX. The effect of light and salts on gelatin. By A. Galinsky . 1706

CXC. On the presence of a volatile organic chlorine compound in blood. By N. Morris and S. Morris. (With three figures) 1716

CXCI. The action of arsenite on tissue respiration. By A. Szent-Györgyi 1723

CXCII. The effect of cooking on the digestibility of meat. By W. M. Clifford. (With one figure) 1728

CXCIII. Determination of maltose in plant extracts by maltase. By N. Narasimhamurty and M. Sreenivasaya 1734

CXCIV. The correlation of the oxidation of certain phenols and of dimethyl-*p*-phenylenediamine by bacterial suspensions. By F. C. Happold . 1737

CXCV. The alcohol-solubility of the anti-dermatitis, more heat-stable vitamin B_2 constituent of the vitamin B complex. By H. Chick and A. M. Copping 1744

CXCVI. Egg-white as a source of the anti-dermatitis vitamin B_2. By H. Chick, A. M. Copping and M. H. Roscoe 1748

CXCVII. The distribution of the vitamin B complex. I. Leafy vegetables. By M. H. Roscoe 1754

CXCVIII. The composite nature of the water-soluble vitamin B. III. Dietary factors in addition to the anti-neuritic vitamin B_1 and the anti-dermatitis vitamin B_2. By H. Chick and A. M. Copping. (With one figure) 1764

CXCIX. The biological values of proteins. I. A method for measuring the nitrogenous exchange of rats for the purpose of determining the biological value of proteins. By H. Chick and M. H. Roscoe 1780

CC. Selective fermentation. II. Fermentation of sugar mixtures by Sauterne yeast. By H. Sobotka and M. Reiner 1783

CCI. The non-sugar reducing substances of human blood in pathological conditions. By F. K. Herbert and M. C. Bourne. (With one figure). . 1787

CCII. The biological values of proteins. II. The biological value of purified caseinogen and the influence of vitamin B_2 upon biological values, determined by the balance sheet method. By M. A. B. Fixsen. (With one figure) 1794

CCIII. A comparison of the colorimetric and electrometric methods for the determination of the p_H of serum or plasma. By R. J. Fosbinder and J. W. Schoonover 1805

PAGE

CCIV. Heart block in pigeons, curative factor. By C. W. Carter . . 1811

CCV. A quantitative comparison of the curative activity of torulin (vitamin B_1) upon the adult pigeon and the adult white rat. By H. W. Kinnersley, R. A. Peters and V. Reader 1820

CCVI. The curative activity of the antineuritic vitamin of rice. By B. C. P. Jansen, H. W. Kinnersley, R. A. Peters and V. Reader . . 1824

CCVII. The assay of vitamin B_1. By V. Reader. (With two figures) . 1827

CCVIII. Maintenance nutrition in the adult pigeon, and its relation to torulin (vitamin B_1). I. By C. W. Carter, H. W. Kinnersley and R. A. Peters. (With three figures) 1832

CCIX. Maintenance nutrition in the adult pigeon. II. By C. W. Carter, H. W. Kinnersley and R. A. Peters. (With four figures) 1844

CCX. The effect of hydrogen ion concentration upon the precipitation of certain basic substances by phosphotungstic acid. By R. A. Peters. (With one figure) 1852

CCXI. The relation of hydrogen ion concentration to the precipitation of purified torulin (yeast vitamin B_1) by phosphotungstic acid. By H. W. Kinnersley and R. A. Peters 1856

CCXII. The analysis of the osmotic pressures of the serum proteins, and the molecular weights of albumins and globulins. By G. S. Adair and M. E. Robinson. (With seven figures) 1864

CCXIII. The inhibition of esterases by excess substrate. By D. R. P. Murray. (With three figures) 1890

CCXIV. Investigations on the separation of the digestion products of the proteins by the method of differential dialysis. By S. V. Desai . . 1897

CCXV. The development and phosphatase activity *in vivo* and *in vitro* of the mandibular skeletal tissue of the embryonic fowl. By H. B. Fell and R. Robison. (With Plates VII–IX) 1905

CCXVI. The possible significance of hexosephosphoric esters in ossification. VIII. Calcification *in vitro*. By R. Robison and K. M. Soames. (With Plate X and one figure) 1922

CCXVII. The possible significance of hexosephosphoric esters in ossification. IX. Calcification *in vitro*. By R. Robison, M. Macleod and A. H. Rosenheim. (With Plate XI) 1927

CCXVIII. The reaction of antimony trichloride with cod-liver oil and its unsaponifiable fraction. By E. L. Smith and V. Hazley. (With three figures) 1942

CCXIX. The determination of vitamin A. By K. H. Coward, K. M. Key, F. J. Dyer and B. G. E. Morgan. (With nine figures) 1952
